Supporting Every Young Learner: Maryland's Guide to Early Childhood Pedagogy, Birth to Age 8. (2015). Baltimore, MD, Maryland State Department of Education

# I. Program Administration

#### **Program Philosophy**

1.1 The early childhood program's philosophy statement and policies are consistent with early childhood practices that are age and developmentally appropriate and reflect the role of families. The written philosophy statement for the early childhood program is used by the staff as the foundation for planning, for staff development, and for implementation, evaluation, and continuous improvement of the program.

#### Indicator

#### 1.1.1 Philosophy

The program has a written philosophy and mission statement, which reflect effective early childhood practices; best practices for staff; and an appreciation for diversity and welcoming individuals of all abilities.

#### **Required Evidence**

**Program Notes** 

Written philosophy and mission statement

#### **Best Practices Rationale**

The philosophy and mission statement are integral components of the program. Both reflect the principles of developmentally appropriate research and literature-based practices; best practices for staff; and the role of families in the education of their children. The philosophy and mission statement exhibit a respect and appreciation for diversity of the global community and is welcoming of adults and children of all abilities.

The philosophy and mission statement describe the beliefs and practices of the program related to children, families, and staff. The philosophy and mission statement are shared with staff and families. Staff members are knowledgeable of the philosophy and mission of the program.

Standard	
1	Philosophy
	statement and policies are consistent with early tally appropriate and reflect the role of families. will the staff as the
Indicator	Best Practices Rationale
1.1.2 Program Evaluation  The program establishes and implements a process for ongoing program evaluation.  Annually, the program conducts a self-evaluation of the program policies, procedures, and practices. The results of the program evaluation are shared with staff, families, and other stakeholders.	Annual program evaluation is a process to help check the effectiveness of the program; identify systemic issues, and consider improvements/adjustments. It is also an important way to examine quality, and work to continually improve your program. Program evaluation is a key part of program planning and continuous improvement.
Required Evidence  Process for program evaluation and timeline Copies of completed annual program evaluation  Program goals for on-going improvement	The evaluation process is conducted by program administration, staff, families, and other community partners. Quality requires identification of program goals; assessment of policies and procedures; and the implementation of best practices.  The results of the program evaluation are used throughout the year to ensure program
	accountability.
Program Notes  This is angoing through	out the school year.

#### Program Personnel

#### 1.2.3 Qualification: Child Care Teacher Licensed Child Care/Head Start

#### Indicator

Deensed Child Care / Head Start - Early Childhood Educator, responsible for the care and education of a group of children from birth through age five, must have at least an Associate's degree in Early Childhood Education/Child Development or related field and must hold a Maryland Child Care Credential of level five.

Public School — Classroom Educator must have at least a Bachelor's degree in Early Childhood Education/Child Development or related field and meet Maryland State Certification requirements for early childhood education.

#### Best Proctices / Rationale:

Early Childhood Educators who are appropriately educated are better prepared to plan and implement quality, developmentally appropriate programs for young children. Knowledge of child development and best practice is gained through education experience working with young children, and ongoing professional development.

Programs understand the importance of employing qualified educators and providing ongoing professional development to enhance their knowledge and skills. When the early childhood educator is absent, a qualified substitute is provided to ensure continued program quality.

Educators are provided job descriptions that reflect expectations in: building relationships with children and families, implementing corriculum, instructional and assessment strategies; and professionalism.

#### Required Evidence to Upload:

#### Licensed Child Care/Head Start:

The Director and All Child Care Teachers most hold:

- Maryland Child Care Credential at level 5 or higher, or an Administrator Credential at level 2 or higher or a current certificate from the State of Maryland for teaching in early thildhood education.
- Job Description
- Maryland Accreditation Staff Qualification Form

#### Public School

#### All Prehindergerten Teachers must hold:

- State of Maryland Teaching Certificate in early childhood education OR pursuing residency through the Maryland Approved Alternative Preparation Program, which includes early childhood course work, clinical practice, and evidence of pedagogical content knowledge.
- Job Description
- Maryland Accreditation Staff Qualification form

#### Required Observable Evidence:

nana.

#### **Program Notes**

Both Pre K Teachers are Certified in Early Childhood.

#### **Program Personnel**

#### 1.2.4 Qualification: Assistant Child Care Teacher Licensed Child Care/Head Start

#### Indicator:

Usensed Child Care/Head Start - Assistant Teacher working with Early Childhood Teacher must have a high school diplome and Maryland Child Care Credential of level two or higher.

Public School - Assistant Teacher and/or Paraprofessional working with the Classroom Teacher must have a high school diploma and riteet Maryland ParaPro requirements.

#### Best Practices / Rationale:

Assistant Teachers who are appropriately trained are better prepared to essist with planning and implementing quality, developmentally appropriate programs for young children. Knowledge of child development and best practice is gained through education. experience working with young children, and ongoing professional development.

Programs understand the importance of employing qualified assistant teachers and providing ongoing professional development to enhance their knowledge and skills. When the early childhood teacher is absent, a qualified assistant teacher will ensure continued program quality

Assistant Teachers are provided job descriptions that reflect expectations in: building relationships with children and families; facilitating learning; and professionalism.

#### Regulred Evidence to Upload:

#### Licensed Child Care/Head Start:

#### All Assistant Child Care Teachers must hold:

- CDA Certificate or Maryland Child Care Credential at level 2 or
- Job Description
- Maryland Accreditation Staff Qualification Form

#### All Assistant Teachers and/or Paraprofessionals must hold:

- CDA Certificate or Associate Degree
- Job Description
- Maryland Accreditation Staff Qualification Form

#### Required Observable Evidence:

#### none

Standard	
Program	Personnel
1.2 The early childhood program is collaborat	ively administered, supervised, and implemented
by qualified personnel.	ively administered, supervised, and implemented
Indicator	Best Practices Rationale
<b>1.2.5</b> Professional Support  The program implements policies that provide support to staff in order to meet professional and personal needs.	The cornerstone of a program's success is the staff. Teaching staff are responsible for guiding children's learning experiences in the classroom. The support provided to the teaching staff is essential to children's learning and program quality.
Required Evidence  Lesson Planning Policy  Evidence of Planning Time Professional Development Opportunities	Professional support strategies are effective at: increasing staff retention; promoting personal and professional well-being; and improving performance. Adult restroom and lounge separate from children's activity area; adequate individual storage area for personal belongings; designated meeting or conference area; and time for staff members to meet their personal needs and handle administrative/planning tasks are all strategies for professional support.  Planning time is an essential professional support. Educators need a designated time to think about and plan activities that are engaging, challenging, and developmentally appropriate.

Standard	Continuity		
Frogram	Continuity		
1.3 The early childhood program utilizes curricula and instructional strategies that ensure continuity of learning and development for all children.			
Indicator	Best Practices Rationale		
1.3.1 Transition and Continuity of Services within the program  Program staff develops transition plans for children moving to a new group/classroom within the program that communicate children's individual strengths and needs.	Consistency and continuity play an important role in helping children successfully manage transitions. Young children develop relationships with educators and learn to trust or distrust the world around them through predictable routines and experiences.		
	Children grouped by age will likely change educators and classrooms several times over the		
Required Evidence  Agendas and minutes of transition/articulation meetings between classrooms  Evidence of communication with families regarding transition within the program	course of their enrollment. It is important to recognize that a child who is moving from one classroom to another will experience multiple losses: a place he or she has come to know and trust; an educator he or she depends on and adores; children he or she has befriended; and routines that help him or her feel secure and competent. These transitions are handled with great care.		
	The goal is a smooth transition that minimizes any emotional concerns for the child and family, and maximizes all that is known about the child's prior progress so that there are no interruptions in learning. (p.124, The Guide)

Program Continuity			
1.3 The early childhood program utilizes curri			
continuity of learning and development for all chi	icula and instructional strategies that ensure ildren.		
Indicator	Best Practices Rationale		
<ul> <li>1.3.3 Schedules and Routines</li> <li>The program documents daily routines and schedules to support continuity of learning.</li> <li>Required Evidence</li> <li>Daily schedule includes core components of the day appropriate to the age of the children</li> <li>Schedules and lesson plans reflect intentional planning for daily transitions</li> <li>Daily schedules reflect integrated learning in</li> </ul>	The daily schedule provides a consistent structure that children can come to expect. A routine that children can count on contributes to a sense of comfort and security.  The daily schedule needs to be developmentally appropriate and reflect instruction in the various domains of development. There is a balance of quiet and active learning, time to explore at one's own pace to promote independence, and time to explore with others to build cooperative learning skills. There is a balance between child-directed activities and educator-directed activities. There need to be ample opportunities to scaffold instruction during the day. Educators build in flexibility to be able to follow the interests of the children.		
all seven domains of learning	For children aged two and younger, the schedule is primarily individual. Group instruction for children two or younger is optional. (pg. 121-123, The Guide)		
Program Note

#### **Program Continuity**

1.3 The early childhood program utilizes curricula and instructional strategies that ensure continuity of learning and development for all children.

#### Indicator

#### 1.3.4 Intentional Planning

The program documents lesson plans to support continuity of learning and an organized approach so that interactions are intentional and goal directed.

#### **Required Evidence**

- Implementation of State recommended curriculum, Public School developed curriculum or a curriculum individually developed by the program and accepted by MSDE
- Lesson plans reflect implementation of curriculum and are relevant to children's culture and personal interest
- Lesson plans meet the needs of each and every child, are informed by information gained from families, include information from IEP/IFSP and other resource personnel who may work with a child
- Lesson plans include opportunities for questioning and problem solving; learning through play and child initiated discovery; and children to make choices for how they work on a project

#### **Best Practices Rationale**

Educators strategically plan for and prepare the learning environment so that children can naturally engage in developmentally appropriate learning activities that accommodate their age, experience, and abilities - and that provide exposure and practice for children to reach increasingly challenging goals. As educators plan for children's learning, it is critically important that they set high, achievable expectations for all children, including those with unique challenges due to physical, cognitive, emotional, or linguistic differences. By targeting the particular strengths and interests of each child, educators are able to plan for instruction that supports the achievement of their goals.

Curriculum that is aligned to the Maryland Early Learning Standards reflects intentional and systematic instruction that will advance growth and learning. Lesson plans reflect the curriculum and allow for strategies to provide opportunities for children to be actively engaged in discovery and learning. These should include a mix of child-directed and educator-directed explorations that value teachable moments. (pg. 115-120, The Guide)

Program Continuity			
1.3 The early childhood program utilizes curr continuity of learning and development for all ch	icula and instructional strategies that ensure		
Indicator	Best Practices Rationale		
mulcator	best Fractices Rationale		
1.3.5 Multiple Assessment Methods Multiple assessment methods are used to identify children's strengths, needs, interests, and progress. Information about areas of development and progress are systematically collected and documented throughout the program year.	Ongoing assessment helps educators understand if the curriculum and related lesson plans are effective. The data from assessment helps educators know when it is appropriate to jump ahead, or when they need to circle back to cover material again. Instructional goals are fine-tuned, and decisions about grouping and re-grouping children are based on a variety of assessment data.		
Required Evidence  Written assessment plan Assessment tools are aligned with Maryland Early Learning Standards Evidence of ongoing observations used to inform planning Evidence of informal assessment using portfolios, checklists, anecdotal notes, work samples, etc. Written plans reflecting differentiation of instruction based on assessment	Educators regularly observe the developmental needs and interests of children. Documentation techniques such as anecdotal records, checklists, and collection of work samples are used to gain information about each child's interests, strengths, and needs. Parent's knowledge of their child's learning and development is solicited and incorporated into ongoing assessment strategies.  Attention is given to assessing progress of English Language Learners and other children with linguistic differences. There is evidence of classroom assessment accommodations for children with disabilities. (Chapter 8, The Guide)

•

Standard		
Program Continuity  1.3 The early childhood program utilizes curricula and instructional strategies that ensure continuity of learning and development for all children.		
Indicator	Best Practices Rationale	
1.3.6 Assessment Strategies  Developmentally appropriate assessment informs instruction and is an integral part of daily planning.	Assessing children's development and learning helps educators better understand individual children and tailor learning experiences accordingly, so that all children reach their full potential. Assessment of children is used as part of the curriculum planning and implementation cycle.	
Required Evidence  Evidence of completed assessment tools  Samples of data collected  Evidence of differentiation, e.g. grouping based on assessment data  Strengths and interests of children are reflected in instructional strategies, e.g. think-pair share, cooperative learning, problem solving, etc.	Understanding the whole child helps educators apply the results of assessment in context, allowing educators to focus on the strengths of the child and how those can be used to bolster all areas of learning and development.  The purpose of assessment is to gain a better understanding of a child's areas of strengths and needs, and to adjust instruction to promote learning. It is essential that assessments are intentionally linked to child growth, development, curriculum, and instruction. Educators continuously review progress and use that information to modify their teaching to	
	match the children's pace of learning, abilities, and interests. (Chapter 8, The Guide)

# II. Program Operation

2.1 Environment(Birth to 6 years)

#### **Environment (Birth – 6 years)**

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

#### 2.1.1(a) Outdoor Environment: Safety

The learning environment meets standards for safety, toxicity, construction, and cleanliness. The program must comply with zoning requirements, fire, health, and safety regulations.

#### **Required Evidence**

- Clean
- Well drained
- Free of clutter
- Q Appropriate storage of outside equipment
- Appropriate and well maintained playground equipment
- Appropriate surfaces
- Shaded/covered area

#### **Best Practices Rationale**

Outside play areas are free of sharp or dangerous objects, trash, animals and poisonous plants, garden sprays, alcohol, tobacco, illegal drugs and other hazards. The area is well drained and accessible by safe walkways or paths. If play area is near a road or unsafe area, a fence provides security. The outdoor space has at least one area that provides some protection from the elements.

Equipment is appropriate for the ages and abilities of the children and is well maintained. There is enough portable and stationary equipment so that children have access without long waits. Portable equipment is stored in a locked facility.

Not Met <sup>/</sup> Partially Met	<u> </u> Fully Met	Not Met	Partially Met	Fully Met

#### **Environment (Birth – 6 years)**

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

### 2.1.1(b) Outdoor Environment: Organization of Space

The outdoor space has designated areas and equipment to support various types of play and learning.

#### **Required Evidence**

- Structures for promoting sensory integration
- Space for digging, gathering, and investigating
- Space to play games
- Variety of surfaces to support different types of play i.e. sand, mulch, dirt, grass, blacktop
- Space for large group play
- Space for small group play
- Space for quiet play

#### **Best Practices Rationale**

The outdoor environment provides time for children to learn to play together – how to coordinate their actions for physical activities, how to take turns and collaborate, and how to follow directions in a game. The outdoor space allows for a variety of opportunities for children to interact with large groups, small groups, and individually.

Equipment stimulates a variety of skills (balancing, climbing, ball play, steering, pedaling, etc.) on different levels (tricycles with and without pedals, different size balls, ramp and ladder access to climbing structures). Structures provide opportunities for children to crawl, roll, jump, climb, and swing to promote sensory integration.

Adaptations are made or special equipment is provided for children with disabilities. Outdoor space has a variety of surfaces permitting different types of play. (pgs. 139-141, The Guide)

#### Environment (Birth – 6 years)

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

### **2.1.1(c)** Outdoor Environment: Intentional Learning Opportunities

Daily opportunities provided for structured and unstructured outdoor play as part of the lesson plan/curriculum.

#### **Required Evidence**

**Program Notes** 

- Prop boxes and space to stimulate dramatic play
- O Materials for building
- O Materials for drawing and painting
- Instruments and materials to dance, march, and create sounds

#### **Best Practices Rationale**

Outdoor time is intentionally linked to the learning occurring indoors so that skills are reinforced in multiple venues. Children continue to learn through play, exploration, and discovery in the natural environment. Educators ensure that children are dressed appropriately for daily outdoor learning experiences.

Authentic materials are available for children to construct their learning. Materials are developmentally appropriate, safe, and support learning goals. There is a mix of materials that supports all types of learners so that all children can work to develop new skills and understanding.

Materials are available to support physical development, stimulate dramatic play, support music and movement, and promote building, drawing and creative expression. (pgs. 139-141, The Guide)

Not Met <sup>*</sup> \(\frac{\cap2}{\text{Partially Met}}\) Partially Met	Not MetPartially MetFully Met

#### **Environment (Birth – 6 years)**

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

#### 2.1.2(a) Indoor Environment: Safety

The learning environment meets standards for safety, toxicity, construction, and cleanliness. The program must comply with zoning requirements, fire, health, and safety regulations.

Furniture and equipment meet standards for safety, size, durability, toxicity, construction, and cleanliness.

#### **Required Evidence**

- @ Clean
- Well lighted and ventilated
- Free of clutter
- Separate diapering area, if applicable
- Furnishings are durable and designed to support children's needs
- Furnishings are appropriate height and size
- Developmentally appropriate soft areas

#### **Best Practices Rationale**

Instruction is located in clean, safe, and clutter free areas. Natural light and ventilation are controlled. The environment is planned to avoid safety problems. Bathroom supplies (toilet paper, paper towels, soap) are easily accessible to children. Drinking water is accessible to children.

Furnishings and materials follow the most recent safety standards (available through organizations such as the Consumer Product Safety Commission). Furniture in the classroom is sturdy, in good repair, appropriate in size, and addresses the routine care, play, and learning needs of the children. Furniture is arranged for convenient use.

Furnishings, such as open shelves for safe materials and sturdy storage containers, encourage appropriate independence. Cozy and soft areas (e.g. rug, bean bag chair) are available. Adaptive furniture permits the inclusion of children with special needs.

Date: <u>10/71/2024</u>		Date:		
Not MetPartially Met	YFully Met	Not Met	Partially Met	Fully Met

#### **Environment (Birth – 6 years)**

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

#### 2.1.2(b) Indoor Environment: Organization of **Space**

The learning environment reflects effective and flexible utilization of available space.

#### **Required Evidence**

- O Space for personal belongings labeled for each child
- **10** Large meeting area
- Small meeting area
- Library
- A variety of books and text materials in multiple places in the room
- Calming area
- Space is organized to be child centered, flexible and accessible to all children

#### **Best Practices Rationale**

The indoor environment is welcoming, organized, and adaptable for all children. It provides clear, wide paths for children to move safely. There are areas for large group discussion and activity as well as areas for small group exploration, with a logical flow between such areas.

Children of all ages have a space for their personal belongings, labeled with their name and picture. Meeting areas have a soft yet safe floor covering that is inviting to children. Small group meeting areas may have a table to facilitate activities between educators and children. Children are supported in developing a love of books both in groups and as an individual activity. A variety of books and text materials are a part of all centers, and are rotated to support subjects being explored and the variety of reading levels within a class. (pgs. 125-127, The Guide)

All programs have a calming area where children can relax. The calming area includes pillows, a

	comfortable floor covering and other cozy furnishings. This is a space where children can take their own time to relax and compose so they are ready to move on to a new activity. (p. 134, The Guide)

#### Environment (Birth – 6 years)

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

### 2.1.3(a) Fostering Appreciation and Support for Diversity: Learning Environment

The learning environment promotes an awareness and appreciation of diversity in all its forms such that children see themselves as full participating members in the global community.

#### **Required Evidence**

- Instructional materials are authentic, accurate, and reflect positive images and information about diverse groups
- The environment reflects customs, traditions, structure and songs relevant to the culture of children, families, and staff

#### **Best Practices Rationale**

The learning environment demonstrates respect for all, promotes authenticity in materials, and accommodates the areas of diversity identified in state law (ability, age, gender, ethnicity, sexual orientation, language, race, region, religion, socioeconomic status). In addition, early childhood educators recognize physical, cognitive, social and emotional differences as diversity. (pp. 56, The Guide)

Multiculturalism is relevant and supportive of a diverse staff and family traditions that expand farther than the country from where a child's ancestors originated. It is reflective of what is in our neighborhood and community, honest and true, not just dressed up in traditional clothing, respectful and kind, comprehensive and cross-curricular. The materials, books, pictures, posters, artifacts/realia, music, art, and puppets are authentic in reflecting diversity. The ultimate goal is to ensure that children are able to "see" themselves using these objects and to use them to learn about others.

Early childhood educators are sensitive to read the cues of the family, respect their values and priorities for their children and not insert their own expectations or views. Further, understanding the role the community plays for the family is also key. (pp. 67-68, The Guide)

	the family is also key. (pp. 67-68, The Guide)

Not Met 'Partially MetX_Fully Met	Not MetPartially MetFully Met

#### **Environment (Birth – 6 years)**

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

### 2.1.3(b) Fostering Appreciation and Support for Diversity: Intentional Teaching

Teaching strategies promote an awareness and appreciation of diversity and appreciation of diversity in all its forms such that children see themselves as full participating members in their early childhood program and in the global community.

#### **Required Evidence**

**Program Notes** 

- **Ø** Evidence of collaboration among children
- Activities accommodate various learning styles and are accessible to all children
- Activities that promote an understanding and value of diversity in all its forms
- Characters in books and social stories used to help children understand social interactions, situations, and expectations relevant to children's personal lives

#### **Best Practices Rationale**

The learning environment demonstrates differentiated instruction and accommodates the areas of diversity identified in state law (ability, age, gender, ethnicity, sexual orientation, language, race, region, religion, socioeconomic status). The more early childhood educators are able to help children and adults value and respect diversity in all of its forms, the further we move toward living in a more respectful and cooperative society. Valuing and respecting diversity needs to be part of the foundation of education for all children.

Skilled educators find ways to identify the unique contributions each child brings to the learning environment and adapt practices, routines, and teaching strategies to build upon these contributions. Educators help children work together across gender, cultural, religious, and economic bounds, and engage in true collaboration.

Early childhood educators recognize that there is no such thing as a "typical learner" and that any kind of one-size-fits-all educational approach does not reach all learners. (p. 63, The Guide)

Stan	da	rd
------	----	----

#### Environment (Birth – 6 years)

2.1 A planned and well-structured learning environment promotes active learning and full participation for each child.

#### Indicator

#### 2.1.4 Technology

Appropriate use of technology and interactive media follow a developmental progression in the way children use technology.

#### **Required Evidence**

- Appropriate and equitable shared use of technology
- Interactive use of technology
- Q Adults support and scaffold children's use of technology

#### **Best Practices Rationale**

Effective uses of technology and media are active, hands-on, engaging, and empowering. They give the child control; provide adaptive scaffolds to help children progress in skill development at their individual rates; and are used as one of the many options to support children's learning.

Screen time recommendations from public health organizations are considered when determining technology use for children birth – 5 years of age. Use of technology with children ages 2 – 6 is interactive. Any uses of technology and interactive media in programs for children younger than 2 years of age is limited to those that appropriately support responsive interactions between educators and children and strengthen adult-child relationships.

When used appropriately, and keeping screen time recommendations in mind, technology and interactive media have the potential to enhance, without replacing, creative play, exploration, physical activity, outdoor experiences, conversation and social interactions.

(p. 121, 136, The Guide and NAEYC/Fred Rogers Center position statement)

# II. Program Operation

2.3 Curriculum(3 to 6 years)

St	an	d	arc	ł

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

#### Indicator

#### 2.3.1 Curriculum Content

The curriculum content is integrated and includes concepts for all areas, while being appropriate for the age and level of development of each child.

#### **Required Evidence**

- Learning experiences are interesting and appropriately challenging
- A variety of materials are used for children to engage in learning that fits within the curriculum
- Opportunities for practicing skills are integrated across the curriculum
- The needs of the individual child are balanced with the needs of the group
- Evidence of learning experiences occurring in all domains

#### **Best Practices Rationale**

The Maryland Early Learning Standards define key aspects of development and learning that are the foundation for a child's success in learning. Seven domains are identified as key areas of development for preschool –aged children. Understanding the developmental characteristics of young learners provides a frame of reference so that early childhood educators can anticipate and plan for a continuum of children's learning.

Taking all of the domains of development into consideration and adding temperament, personality, interests, family culture, and wellness into the unique profiles of a child's knowledge, skills, and attitudes toward life and learning is taking a whole child view. This is important when considering the development of a child because looking at a specific domain informs what to teach and how to build-up individual skills in a child. Looking at the whole child informs how to teach including approaches differentiation individualization, and pace. Providing ways for children to demonstrate understanding gives each child the opportunity to express their abilities and interest as individuals. (pp. 21, 26, 29, The Guide)

#### Standard Curriculum (3 to 6 years) The early childhood program utilizes curriculum that supports each child's development. 2.3 The curriculum is aligned with Maryland's early learning standards. Indicator **Best Practices Rationale** Young children's attention, self-regulation and 2.3.2 Social Foundations social behaviors are as important as cognitive Children are provided opportunities to engage in abilities as predictors of later academic success. playful learning to support social foundations Social foundations include the skills necessary to skills. regulate one's own behavior and emotions, develop healthy relationships with adults and other children, and create a sense of positive identity. It focuses on children's approaches to learning including: their willingness to initiate, **Required Evidence** engage, and sustain participation in different learning activities; their ability to demonstrate Age appropriate classroom rules written in control through executive function skills; and positive terms are posted self-regulation to remain on task in the face of Intentional activities that promote distractions and comply with rules, routines and appropriate behavior such as: expectations. Class meetings/circle time discussions Skilled early childhood educators intentionally Small group interactions plan for and help young children learn how to Paired activities develop healthy relationships with adults and Role playing other children. Small group problem solving **Ø** Educators use visual cues and social stories to Educators and children generate classroom rules support conflict resolution and self-regulation together and decide on appropriate strategies consequences throughout the year. Social conflicts between children are used as a learning Educators model positive social interactions experience with educators providing guidance with all children and adults and support to help children resolve conflicts. © Educators have respectful interactions with (pp. 22, 81, The Guide) children **Program Notes**

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

#### Indicator

#### 2.3.3 Executive Function

The development of approaches to learning and executive function skills facilitate and support the process of learning.

#### **Required Evidence**

- Visual cues to guide children's choices and decisions in social situations
- Visual cues to help children plan their play and work
- Opportunities to engage in play such as:
  - Role playing
  - Turn taking
  - Rule making
  - Making choices

#### **Best Practices Rationale**

Executive function is part of social foundations and includes working memory (i.e. short term memory), so that children are able to hold information in their mind and recall it when needed, and cognitive flexibility, so that children are able to engage in problem solving and symbolic representation. Inhibitory control, the ability to control one's impulses, is also an executive function skill.

Working memory and mental flexibility strengthen as children gain, through practice, the ability to wait for their turn, return to interrupted work, or wait for the educator's attention (and remember why they wanted to talk to their educator). Early childhood educators continuously support children in building executive function because it influences learning at all stages.

Throughout the day, skilled educators look for ways to introduce and extend exposure to the types of executive function skills that will serve children long into the future. This includes those skills that facilitate and support the process of learning, such as a child's willingness to initiate, engage, sustain participation in different learning activities, and the ability to demonstrate control, so that they can remain on task in the face of distractions. (pp. 22, 83, The Guide)

#### 

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

#### Indicator

# 2.3.4(a) Language Arts: Listening & Speaking Children are provided with learning experiences that develop effective listening and speaking skills, enabling them to increase the development of oral language in a variety of contexts.

#### **Required Evidence**

**Program Notes** 

Date: 10/211

Not Met

- Teaching staff model and elicit standard English and complete thoughts
- Opportunities for children to listen and respond to daily read-aloud
- Opportunities for children to increase vocabulary through listening activities
- ♥ Opportunities for children to participate in individual and small group discussions
- Opportunities for children to speak to inform, to question, to retell, and to dramatize using complete thoughts
- Opportunities for children to participate in process drama

Partially Met

#### **Best Practices Rationale**

Early childhood educators promote opportunities for speaking and listening by modeling the role of the speaker as well as the listener throughout the day. Engaging children in conversation, making eye contact and asking questions help children develop their speaking and listening skills. Children will learn how to take turns during a discussion and to ask questions. Children need opportunities to work in pairs to share information, take turns speaking and listening, and ask other children to repeat what was said to help develop their listening and speaking skills. (pp. 87-88, The Guide)

Children need multiple opportunities to hear language to develop and expand vocabulary. English language learners are supported in speaking their home language while learning English. Through a variety of activities in large and small groups, children develop confidence in their abilities to express their needs, choices, feelings, and points of view.

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

#### Indicator

#### 2.3.4(b) Language Arts: Reading

Learning experiences in the reading foundational skills are provided for children, including print awareness, phonological awareness, fluency, comprehension, and vocabulary development.

#### **Required Evidence**

- Educators model and implement age appropriate reading strategies, e.g. fingerplays, rhyming, picture matching, phonics and phonemic awareness activities, and comprehension strategies
- Classroom library contains 2-3 books, of various genres, per child.
- Educators intentionally use functional and environment print
- Children are provided opportunities for choral reading
- Children are given feedback to promote the development of reading foundational skills
- Children are provided opportunities to read for enjoyment

#### **Best Practices Rationale**

To promote print awareness and concepts, children have regular exposure to books to see how spoken words are represented in print. Educators help young children make connections to print in books as well as in the environment.

Phonemic awareness and phonics are elements of phonological awareness and precursors to emerging reading skills. Educators use systematic instruction where there is a deliberate and sequential focus on building relationships between sounds and letter symbols so that children can begin to decode new words. Educators also help children develop recognition of sight words.

Educators model fluency through read-aloud stories and provide opportunities to read and reread familiar texts. Literature and informational texts are used to expose children to a variety of genres.

Educators provide strategies and activities to build children's vocabulary and comprehension. By asking questions or having children make choices, educators are supporting comprehension skills and vocabulary growth. (pp. 88-91, The Guide)

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

#### Indicator

#### 2.3.4(c) Language Arts: Writing

Daily writing instruction includes opportunities to write for a variety of intentional purposes.

#### **Required Evidence**

- Children are provided opportunities for intentional writing to express ideas
- Educators model writing during shared writing, class book creation, language experience charts, and dictation
- Writing center with varied materials are available daily
- Variety of writing materials available in all learning centers
- Child generated books are displayed and available to children

#### **Best Practices Rationale**

Skilled early childhood educators make writing a part of every center in the classroom, so that children have many opportunities throughout the day to practice. Writing is an effective means for expressing ideas that can be shared with others, rather than a laborious task of practicing penmanship.

Educators help children understand that thoughts and ideas can be represented in drawing and writing and that those convey meaning. Children are encouraged to express ideas using shapes, symbols, drawings, or dictating words and phrases. Children may use inventive spelling, while adults model "adult writing" when a child is dictating a story. (p. 92, The Guide)

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

#### Indicator

#### 2.3.5 Mathematics

The curriculum includes mathematics content and process outcomes that support children's ability to solve problems, reason, and make and communicate connections.

#### **Required Evidence**

- Children are provided opportunities for hands-on activities that support mathematical concepts e.g.: counting, graphing, sorting, weighing, measuring, subitizing, comparing, etc.
- Materials/manipulatives are available for children to explore and practice math concepts daily
- Educators use and encourage mathematical vocabulary throughout the day
- Educators integrate mathematical concepts into all content areas and learning centers
- Educators promote exploration and inquiry through the use of questioning

#### **Best Practices Rationale**

Early childhood educators create opportunities for children to learn and manipulate mathematical ideas and concepts through play, exploration, and analysis. They are aware of how to build on children's experiences and intentionally incorporate math into everyday learning across the curriculum. The five strands of math are counting and cardinality, operations and algebraic thinking, measurement and data, geometry, and number and operations in base ten.

Educators use children's natural interest in math to enhance their experiences in preschool and school, using the following practices:

- Establish number and operations as a foundational content area
- Incorporate math in other content areas
- Use progress monitoring to guide instruction
- Focus on teaching children to view the world mathematically
- Intentional daily math instruction

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

#### Indicator

#### 2.3.6 Science

The curriculum emphasizes skills and processes and engages children in activities that include real-life connections and problem-solving opportunities.

#### **Required Evidence**

- STEM is integrated in all learning centers and content areas
- Authentic use of science vocabulary in functional print and literature
- Children are provided opportunities to ask questions, explore, and observe materials and phenomena
- Children are provided opportunities to make comparisons between objects and materials
- Variety of tools and multisensory materials that support curriculum implementation
- Educators use questions that promote exploration and inquiry

#### **Best Practices Rationale**

Educators help children develop scientific thinking skills while exploring the natural and physical world around them. As children explore with sand and water, cook, garden, or care for a pet they are recognizing patterns, making predictions, and formulating answers to questions. The educator's role is to bring the scientific vocabulary to these activities and ask children questions that expand their thinking.

Using inquiry-based and problem-based learning, educators guide children toward the scientific processes of observation, prediction, and investigation. Young children use information from science, technology, engineering and mathematics (STEM) while engaged in activities that include real-life connections and problem-solving opportunities. (pp. 97-99, The Guide)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

### Indicator

### 2.3.7 Social Studies

The curriculum focuses on key knowledge, concepts, skills and attitudes in the areas of history, government, economics, geography, and peoples of the nations and world.

# **Required Evidence**

- Age appropriate classroom rules written in positive terms are posted
- Authentic materials representing social studies concepts (e.g. books, music, dolls, globes, and/or maps of classroom, school, U.S., world, etc.)
- Authentic opportunities to learn about people and their roles
- Authentic use of social studies vocabulary
- Variety of print materials (newspapers, magazines, books, original photographs, etc.)
- Children are provided opportunities to work collaboratively with peers
- Social studies activities are integrated in all learning centers and content areas

#### **Best Practices Rationale**

Early childhood educators help children understand their sense of self-identity and the part they play in their family, the early childhood program, and the community. Educators help children value diversity and recognize the important role that each person plays in building a strong and vibrant society. The social studies program enables children to participate effectively in the groups to which they belong. Democratic and participatory school and classroom environments are essential to this type of real world learning. (pp. 99-100, The Guide)

The social studies program focuses on opportunities for children to learn about themselves, their community and the world. Learning takes place in the context of openness and appreciation for diversity of culture, and respect for similarities and differences among people. Activities that foster citizenship skills and an understanding of the unique qualities and characteristics of others promote cooperative learning and achievement of common goals.

# Curriculum (3 to 6 years)

2.3 The early childhood program utilizes curriculum that supports each child's development. The curriculum is aligned with Maryland's early learning standards.

# Indicator

### 2.3.8 Fine Arts

Fine arts curriculum provides regular opportunities for children to create, perform, and respond to quality and culturally diverse experiences in visual art, music, theatre, and dance.

# **Required Evidence**

- Opportunities for children to engage in creative movement, dance and music
- Opportunities for children to analyze, interpret, and select artistic work for presentation
- Children's creative work is labeled with name and displayed in the classroom/program
- Utilization of various music forms i.e.: classical, folk, country, lullabies, cultural music, etc.
- Children are provided opportunities to relate personal experiences and knowledge to various forms of art
- Fine arts are integrated in all content areas and learning centers

# **Best Practices Rationale**

Opportunities to engage with the arts are integrated throughout the curriculum. Children have multiple opportunities for the following:

- Creating new art in all its forms
- Performing, presenting, and producing art in all its forms
- Responding to all forms of art
- Connecting with art in a personally and culturally meaningful way

(pp.101-102, The Guide)

Instruction in the arts is focused on the process of creating and engaging in art rather than the end product. Young children have time to explore materials in multiple ways. Early childhood educators recognize the value in stand-alone experiences with the arts, but also find ways to integrate the arts into all curricular areas. Children have the opportunity to engage in independent art experiences and educator-guided art experiences.

# II. Program Operation

2.4 Instruction(3 to 6 years)

# Instruction (3 to 6 years)

2.4 Curriculum is delivered through instructional strategies which support each child's development and attainment of Maryland early learning standards.

### Indicator

# 2.4.2 Independent Learning Exploration

Independent learning provides opportunities for children to explore, experiment, question, investigate, and problem-solve. Children take responsibility for their learning.

# **Required Evidence**

- Learning centers/Interest areas are accessible to all children
- Daily schedule provides adequate time for children to immerse themselves in independent learning exploration
- Appropriate equipment, manipulatives and materials are accessible
- Children are engaged in independent learning activities
- Authentic objects and props are utilized by children daily

# **Best Practices Rationale**

Materials that encourage open-ended thinking and active participation are an integral part of daily application and follow-up learning. Educators facilitate learning based on the understanding of each child's developmental strengths and needs and use independent learning opportunities to observe and record children's performance. This is a dynamic process between the educator and child with the educator being the facilitator and the child becoming the investigator.

Independent learning is an integral part of each day. Educators provide time for children to immerse themselves in learning without the pressure of a quick rotation from one center/task to the next. A tremendous amount of development happens as children work within learning centers.

Learning center goals are linked to the goals of the curriculum. Educators are mindful of connecting the opportunities in learning centers to the domains of development, providing multiple modalities, and offering multiple levels of tasks so that all learners can work together but on different activities within a learning center. (pg. 128, The Guide)

# on different activities within a learning center. (pg. 128, The Guide) Program Notes Initial Self-Appraisal Rating Date: 10 2 2 2024 Not Met \_\_Partially Met \_\_Fully Met \_\_Not Met \_\_Partially Met \_\_Fully Met

# Instruction (3 to 6 years)

2.4 Curriculum is delivered through instructional strategies which support each child's development and attainment of Maryland early learning standards.

# Indicator

# 2.4.3 Authentic Learning

Instruction integrates concepts of curriculum into developmentally appropriate practices and relates in a meaningful way to children's real life experiences.

# **Required Evidence**

Educators provide topics/discussions relevant to young children's interests and needs

Classroom activities reflect children's prior experiences

### **Best Practices Rationale**

Instruction is presented in the context of the child's world and related in a meaningful way to real-life experiences. Educators facilitate learning based on children's prior experiences, documented observations, and work samples as part of their ongoing assessment of children's strengths and needs. As part of daily instruction, educators facilitate opportunities for children to investigate, apply, and extend their learning. When educators provide home/school connections, children are able to extend and apply their learning outside the classroom. The planning process includes alignment with curricular objectives across content areas.

# Instruction (3 to 6 years)

2.4 Curriculum is delivered through instructional strategies which support each child's development and attainment of Maryland early learning standards.

# Indicator

# 2.4.4 Instructional Strategies

Instruction is based upon children's individual needs, interests, strengths, and learning styles.

# **Required Evidence**

Educators provide opportunities and activities that meet children's needs:

- Cooperative learning experiences
- Exploratory learning centers
- Differentiated tasks
- Scaffolding

Educators implement strategies that encourage higher level thinking skills such as

- Open-ended, higher level questions, and investigation
- Cooperative learning strategies
- Problem solving strategies
- Balance of educator-directed and childinitiated experiences
  - Multiple and flexible means for children to express and engage in learning

# **Best Practices Rationale**

Educators align instructional practices, curriculum, and assessment methods for the purpose of facilitating each child's learning. To help children to acquire new skills and concepts, educators select from a range of strategies, including: asking open-ended questions; offering cues and prompts; listening attentively to children's responses and giving them enough time to express themselves; demonstrating skills; adding more complex materials or concepts to a learning situation; and providing opportunities for cooperative learning.

Because there is no such thing as a "typical learner" and any kind of one-size-fits-all educational approach does not reach all learners, children of all abilities need a variety of opportunities to access curriculum and assessments. Educators provide multiple and flexible ways for children to demonstrate what they have learned. Educators also have multiple and flexible means of engaging the learner so that all children are motivated to learn. (p. 63, The Guide)

# Instruction (3 to 6 years)

2.4 Curriculum is delivered through instructional strategies which support each child's development and attainment of Maryland early learning standards.

### Indicator

# 2.4.5(a) Management Strategies: Transitions Instruction incorporates management strategies which facilitate logical and organized transitions and routines.

### **Required Evidence**

- Wait time is limited for children during transitions
- © Educators use a variety of strategies to signal a transition is approaching
- Educators use a variety of behavior management strategies that result in positive learning behaviors (e.g., acknowledging positive behavior of children, avoidance, ignoring, etc.)
- Children know routines

**Program Notes** 

Visual schedule is posted to assist children with daily routines

### **Best Practices Rationale**

Children are learning important life skills as they transition from one activity to another. Transition times are opportunities for developing social foundation skills. In this, educators help children learn how to manage choices and change, how to plan their time, how to follow directions, how to work collaboratively, and how to learn responsibility. The main idea is that transitions are a time for learning, too.

The classroom community is organized and structured. The children are aware of expectations and daily routines. Children and educators share responsibility for the classroom. Minimal amounts of time are spent getting ready, sitting, and listening. Sufficient time is allocated for transitions to allow children to clean up and prepare for the next activity. Educators use a variety of strategies to signal a transition, e.g. rhythmic clapping, finger play, son, dimming the lights, ringing a bell, music, or verbal announcement. (p. 123, The Guide)

Initial Self-Appraisal Rating Date:	Final Self-Appraisal Rating Date: Not Met Partially Met Fully Met

# Instruction (3 to 6 years)

2.4 Curriculum is delivered through instructional strategies which support each child's development and attainment of Maryland early learning standards.

# Indicator

# Best Practices Rationale

2.4.5(b) Management Strategies: Behaviors Instruction incorporates management strategies which facilitate and promote positive behavior.

Early childhood educators use positive strategies, e.g. re-direction, to support children's appropriate behaviors. Educators' responses are consistent in guiding behavior to meet each child's developmental needs.

When problems arise, the educator responds quickly to support the child and maintain the safety and flow of the classroom.

# **Required Evidence**

Educators use visual cues that support classroom expectations

Children know classroom rules and expectations so they can function with appropriate adult supports based on age and developmental need

Children are actively involved in creating solutions to classroom challenges.

Classroom activities and expectations are appropriate to the age and developmental needs of children. Educators are intentional in teaching positive social interactions to all children. (pp. 70-73, The Guide)

# 3.1.2 Supporting Child Development

Families, community members, and staff collaborate to promote child development and learning at home.

# **Required Evidence**

- Evidence of family education and outreach containing information about child development and learning
- School readiness materials shared with families

# **Best Practices Rationale**

Effective family engagement strategies create a culture of high expectations in programs where family members support learning at home and monitor their children's performance. They advocate for their children and are active in guiding their education.

Families are respected as the experts on their children. Educators engage families about their hopes and dreams for their children. Families are asked about any ideas or concerns they may have regarding collaboration and involvement. Educators take the time to listen to family ideas and concerns, as well as invite them to continuously share input. Educators and families work together to set goals and identify ways in which they can work together to achieve those goals.

Educators share information about evidence-based family programs to support specific family engagement goals. These goals may focus on literacy, comprehensive family support, home visiting, or school readiness goals. Strategies that encourage engagement also include sending materials home with tips for families to support learning at home. (pp. 41-46, The Guide)

# **3.1.3** Communication of Assessment Information

Assessment information is communicated with children and parents/guardians on a regular, ongoing basis or at least twice per year.

# **Required Evidence**

- Ch, Completed Progress Reports/Report Cards
- Conference Schedules (twice per year)
- Completed Parent-Teacher Conference form
- Documentation of strategies shared with families to support development

### **Best Practices Rationale**

As early childhood educators talk with families about the purpose of assessment, they acknowledge the important role that families play as their child's first educator. Early childhood educators need families to be active participants in supporting children's learning in and out of the home.

From the beginning, early childhood educators talk with families about the importance of regular, ongoing assessment and how different assessments are used to monitor children's progress. Assessments help educators and families better understand the strengths and potential challenges of individual children, so that strategies can be tailored to best meet each child's interests and needs.

A parent-teacher conference is the typical approach used to share information about children's learning and the growth they have made. Most critical in those conversations is the professional guidance by educators on what families can do at home to support their child's learning. Providing suggestions for action is also important so that the family knows precisely what they can do to help their child make gains in a given area of development. (pp. 188-189, The Guide)

# 3.1 Family and community partnerships support the success of early learning programs.

# Indicator

# 3.1.6 Evaluation

Family and community partners are encouraged to provide input to strengthen early learning programs, family practices, and children's learning and development.

# **Required Evidence**

Completed parent survey

# **Best Practices Rationale**

Evaluation and feedback from families are important elements of successful programs. There are three steps programs can use to evaluate their effectiveness:

- Measuring participation and attendance at events to help identify how to best recruit and retain participants
- Gathering baseline family data at the beginning of the year, which allows staff to identify roadblocks or strengths for families
- Surveying the needs and satisfaction of families to tailor the types of activities to support families

Knowing the research on the characteristics and evaluation practices of successful family engagement programs can be helpful as educators seek to develop or choose initiatives to engage their families. A systemic approach where family engagement values and principles are woven into every aspect of the program has a greater likelihood of being effective and successful.
